Gleichen Fair August 19th and 20th.
Calgary Exhibition July 5th to 10th.

It appears the members of the council are not agreeing very well
in their deliberations and administration of the town's business, and
apart from their excellent work in securing the agreement to drill for
gas, little has been accomplished so far this year. The trouble appears
to be mainly that all three cannot agree or rather not two have the same
opinion. The Call is at the present time prepared to discuss the
subjects in dispute, and now will only urge the members to attend the
Council meetings and let the councillors know what they desire in im-
provements.

All who are fond of seeing one fellow thumb another certainly had
their appetites satisfied if they attended the Sault-South fight on Satur-
day evening. It may be questioned by some very good people whether
or not this should be allowed, but in this western country the rule is to
respect each others opinions and if men want to fight they fight and if
they prefer to pray they pray, or they may do almost anything else so
long as they do not interfere with those who do not want to join in the
action what ever it may be. It is simply a case where the law is made
to suit the people rather than the people to suit the law. One thing is
certain and that is those who were saw the entrance of men ex-
ercised and also that those men could fight and yet be good friends.

The weather has been ideal for the growth of all the
young crops the past few weeks. The condition of the soil
was so good at seeding, and the weather has been so favorable
since, that the time lost on account of the late spring
has been more than made up. In fact the growth in this
district has been so rapid that already some of our fair ones are
speculating as to whether or not the grain will lodge. The railway reports
issued every few days are full of encourage-
ment, and altogether the prospects for a bumper crop are
more than satisfactory.

The agreement between Mr. Dingman and Gleichen
has been duly signed by the council and within a year Mr. Ding-
man's intention to start before that time and he states he
will begin operations as soon as he can get the plant and
material on the grounds. While in years to come it may
be said the council might have made a better bargain at the
present time the deal appears a very fair one and the
councillors are to be congratulated upon carrying the deal
through successfully this year. The magnitude of the un-
dertaking may be understood when it is known that Mr.
Dingman's company has already expended \$155,000 at
Calgary and he states the expenditures there have only
commenced now that gas has been struck in commercial
quantities. It is not expected the drilling will be so deep
at Gleichen or so costly as at Calgary, but it will neverthe-
less necessitate a large expenditure.

The Hand Behind the Plow Guides the Ocean Liners

And now the great ocean steamship liners are looking to the farm-
ers for freight as well as the staff of life.

Emil L. Boas, the New York director and general manager of the
Hamburg-American Steamship company, in an interview said that the
only hope for the prosperity of the transatlantic steamship companies
for the next few years rested entirely upon the possibility of grain
cargoes.

"There is no denying the fact," he said, "that the ocean-carrying
trade is largely overbuilt. This state of affairs is just as true of the com-
panies operating trading lines as it is of the regular lines. But with good
main crops and general conditions which will allow of exportation on the
proper scale recovery could be made within the space of a few years—
that is, if the steamship companies could themselves with the present
development."

"That being the case," Mr. Boas was asked, "is it not to be ex-
pected that a general policy of building restriction will be adopted by all
the large transatlantic companies?"
"I can't say as to that," he replied. "I only know that the ex-
isting state of affairs calls for some such arrangement. Quite a number
of new vessels are now on the ways, and when they are placed in com-
mission the situation will be further complicated to the extent of their
carrying capacity."

Although making no positive statement, Mr. Boas intimated that the
Hamburg-American policy for the immediate future at least would be
one of extreme care, verging on actual retrenchment.

"Mr. Harriman is right when he says the country's prosperity
is almost wholly dependent upon the success of the crops," concluded
Mr. Boas. "The steamship people at least appreciate the truth of this.
With good crops and an absence of wild speculation, to be inevitably
followed by panic, the ocean carrying trade will come into its own again
and both passenger and freight traffic will reach a volume which will
show a satisfactory margin of profit, even with the present large amount
of tonnage in operation."

GREETING SPRING.

An Old and Picturesque Custom in Switzerland.

The first of March is a day of joyful festivity among the school children in most of the Alpine countries in Switzerland. At a 'clock in the morning a party of schoolboys march through the village clanging cowbells, big and little, with all their might to proclaim the dawn of a bounteous day for their stammering schoolmates still asleep.

As the day grows bright the boys gather, each one with a huge bell hanging around his neck, on the village square, where they form in ranks, so-called 'cavalry', and then the preparations, always conducted amid great confusion and jovial hilarity, have been completed the procession starts on its way through the streets to the accompaniment of furiously bell ringing and noisy yodelling.

One of the chief of the demonstration is dressed in the costume of a dairyman, with yellow breeches, white stockings, low shoes, finely embroidered brass over a shirt of spinnaker, and a long, narrow, white apron, which is turned up at the back of his head, matches proudly at the head of the band. At the end of the procession is another big boy with a big staff in his hand.

All this remains up to the way the new year goes to the school, and the boys. The whole festival is nothing but a merry celebration to herald the return of the milder season, which has been looked forward to with longing for months.

The custom is said to be of Roman origin; hence its name, 'Chalanda' (from Kalends), which justifies the assumption that, from the period of the year chosen for the celebration of the festival, it must have originated in the mild climate of Italy and not in the cold clime of the Alps.

In the way described the troop marches on its way to house to house, and the boys, dressed in their best, are presented by the masters with rice, chocolate, oranges, bread, and money. The whole is a very merry scene, and the guests always contribute some small change. Out of the proceeds a general collection is provided, in which the girls of the neighborhood take part.

How intense is the youngsters' enjoyment of the Chalanda! Many children are scarcely by imagined by any one who has not looked on at these annual jubilees.

In the Days of Sir Allan Mackay. A handsome picture of the remains of Sir Allan Mackay will be removed from the City of London to the City of London, after resting in the City of London for nearly seventy years.

Months ago, long after Allan was still very much alive when The Toronto Examiner of June 10, 1847, said of him: "Sir Allan Mackay is a great man."

Speaker of the House of Assembly, and the representative of Hamilton, president of the Gore District Football Club, and the prime mover of the efforts and wrongs of another church. The remains of Sir Allan Mackay will be removed from the City of London to the City of London, after resting in the City of London for nearly seventy years.
